Axosoft is a reliable project manager, which offers you a comprehensive environment in which to add or modify data. It works with Microsoft SQL Server, a powerful database editor, which enables you to calculate workflows, view activity logs and oversee general progress. Axosoft is designed to help you in project management and monitoring, allowing you to supervise each task, step or version. The comprehensive table view displays the name of each step in the workflow, its priority, the manager / member to whom it is assigned, as well as the status of each entry. You may view the estimated duration and a real-time comparison with the real work-time. The table can easily be customized, by enabling or disabling additional columns. Moreover, you can view the list of customers, beneficiaries of the current project, as well as the users and team members. This simple to handle table view allows you to manage and control the task assignment, teams and customers. The items in the table can be displayed in a Card View so that you may visualize the steps of the plan. Axosoft is suitable for managing projects, for example developing Web applications. The application can track all the data on the server, such as user information, settings, accomplished tasks, issues and features. The main screen is designed to centralize information gathered from all the teams, as well as from the customers. The integrated email client is a convenient tool, which allows you to easily keep in touch with clients and, as well as other members of your team. The tool allows you to adjust project visibility, track bugs and automate the general workflow. The Dashboard tab is designed to automatically generate charts regarding the main progress of the current project, user workload or comparison between the estimated and actual duration. Moreover, it can calculate required work velocity and indicate the deadline. Axosoft Description: Axosoft is a reliable project manager, which offers you a
